

RESITE

ENTERPRISE

Training and Performance Support *In an Integrated Solution!*

RESITE Enterprise is a powerful and flexible solution for creating, managing and delivering Training and Performance Support.

- **Real-time recording and editing of content delivers accuracy and cost savings**
Accurately captures and records all keystrokes, mouse clicks, fields and screen shots in SAP and other applications.
- **Automatically build and publish simulations, job aids and context-sensitive Web help**
Eliminates the common Web publishing bottlenecks and gives users access to the most current and relevant information related to their processes when they need it.
- **User-defined workflow controls content movement into production**
Also provides configurable approvals, version control and an audit trail to support regulatory compliance.
- **Automatic notification of changes to SAP that affect documentation**
Email notification assures timely updates of documentation.

**RESITE Enterprise is the best solution
and the best value available today!**

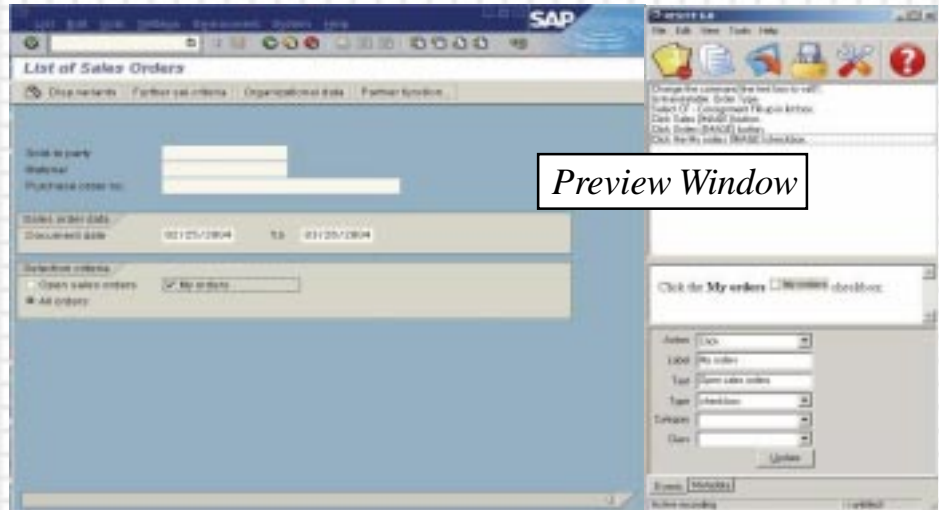

Insite Objects, Inc.

RESITE Recorder

Cuts your training and project documentation time by up to 80%

RESITE Recorder captures the keystrokes, mouse clicks, and screen shots involved in any process and displays them in the *Preview Window* where they can be edited in real-time. No extra steps, edit as you go.

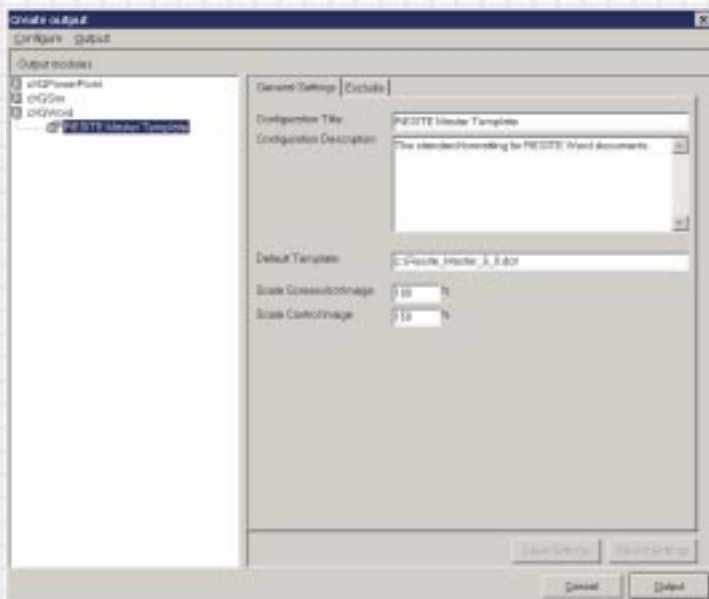

- Saves time
- Reduces cost
- Improves accuracy

RESITE Publisher

Create multiple outputs from a *single source!*

RESITE Publisher uses a defined schedule to automatically create and publish multiple learning objects from a single source. These learning objects include browser-based simulations, job aids, context-sensitive Web help, end-user training materials, business process procedures, test scripts and more.

- Builds the Web site Automatically
- Supports 200+ document formats
- Creates simulations and links them to Web help
- Updates SAP automatically
- Allows you to make all changes to one single source

Our customers identify the need...

RESITE Tracker

Define, enforce and audit your process to control the movement of any document into production!

RESITE Tracker enables you to define and enforce a custom process for managing content deployment to your end-users.

- **Integrated with Publisher and Recorder**
- **Configurable approval paths**
- **Automatic document versioning**
- **Facilitates Regulatory Compliance: ISO, Sarbanes-Oxley, FDA**

RESITE Guard

Automatically keep your EPSS team informed of SAP changes that impact training materials!

RESITE Guard provides configurable notification to everyone concerned with changes made to your SAP system. This allows your documentation and training team to keep training and performance support materials up to date.

- **Provides configurable notifications as changes are made**
- **Provides a list of transactions impacted by changes**
- **Displays detailed information about events**

We build the solution.

Insite Objects delivers RESITE Enterprise, another example of enabling business opportunity with innovative technology.

Insite Objects, Inc. is an employee-owned technology company where success is driven by combining business experience with the brightest technical innovators.

Since 1995, we have been first to implement such breakthrough solutions as:

- Fully integrated CTS workflow (1996).
- Automated unattended transport scheduler (1997).
- First independent SAP delta management technology (1998).
- First implementation of digital imaging recognition in a business application (Resite Recorder, 1999).
- Fully integrated SAP electronic performance support system (2001).
- First fully automated content publishing solution (2002).
- First database driven, email sourced workflow push technology (2003).
- First real-time, interactive edit technology for transaction recording (2004).
- First XML Store-based EPSS system (2004).
